Town of Milton  
101 Federal Street  
Milton, DE 19968

Mr. Robin Davis:

Pursuant to Section 215-28 – Private Wells or Water Systems, Dogfish Head Craft Brewery in conjunction with Dogfish CVI LLC, is requesting a waiver to install one (1) well targeting the Cheswold Aquifer in the Chesapeake Group of aquifers on parcel 235-20.00-53.00. The proposed well will service facilities located on this parcel.

**Proposed Well:**

Depth: Approximately 480 feet  
Casing: 6 inches  
Discharge Rate: 150 gallons per minute

**Proposed Use:**

Process and production water for goods manufactured onsite.  
No waste water generated from the proposed well will be discharged to the Tidewater Sanitary Sewer System without prior approval. The proposed well will not be used to supply existing or future domestic plumbing fixtures (toilets, sinks, urinals, and showers) as those needs are met with existing Town services. Sanitary waste will continue to be discharged to Tidewater Sanitary Sewer System as permitted and approved.

**Location:**

The proposed location is directly south of the new Warehouse Facility.

We appreciate your consideration for this request and should you have any questions please do not hesitate to contact me directly at 302-684-1000 x203.

Nicholas C. Benz  
Chief Operating Officer
