

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER Monitoring Requirements Not Met for Milton Water Department

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we are doing to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the July-December 2015 and January-June 2016 monitoring period, we did not complete all required monitoring to maintain compliance with the Lead and Copper Rule and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for this set of contaminants and how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required Sampling Frequency	Number of Samples Taken	When Samples Should Have Been Taken	Number of Samples To Be Taken	When Samples Will Be Taken
Lead and Copper (Tap)	6-month	0	July to December 2015 January to June 2016	20 samples each monitoring period	July to December 2016

What happened? What is being done?

Milton Water Department failed to collect the required samples and report the results to the Division of Public Health, Office of Drinking Water. Once Milton Water Department has collected the appropriate number of samples and the results are submitted to the Office of Drinking Water, the system will be considered returned to compliance and the notice will be lifted. For more information, please contact Mr. Gregory Wingo at (302) 462 1775 or the Lead and Copper Rule Manager in the Office of Drinking Water at (302) 741-8630.

Please share this information with all other people who drink the water, especially those who may not have received this notice directly. You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Milton Water Department.

Public Water System ID#: DE0000629

Date distributed: 9/30/16
